[5 Best Blood Pressure Monitors - Feb. 2019 - BestReviews](#)

A basic blood pressure monitor should cost between \$20 and \$40. For this price, you just get a basic monitor that takes your blood pressure reading and not much else.

However, at the mid- to high-end of this price range, you may find models that can store data for two users. A mid-range blood pressure monitor costs roughly \$50 to \$80. In this price range, expect a variety of cuff sizes, which may give a more accurate reading, plus the ability to store more data for multiple users.

### **Blood Pressure Monitor - Best Buy Canada**

Blood pressure monitors can compensate for biased readings through regular monitoring at your convenience. They can spot any unusual readings, and take into account other factors that affect blood pressure, such as your level of physical activity or stress. Most importantly, the recorded information can provide your health care practitioner a better understanding of your risks, how well you're responding to medication, or the effects of lifestyle changes.

### **Best Blood Pressure Monitor: Top 6 BPM Reviewed ...**

Stage 1 high blood pressure is defined as a systolic blood pressure a systolic pressure between 130-139 with a diastolic pressure between 80-89 mm Hg. Stage 2 high blood pressure is over 140 systolic and over 90 diastolic. A hypertensive crisis, in which case you would need to seek medical care for immediately, is a blood pressure over 180 mm Hg systolic and/or a diastolic pressure over 120
