Honey badger venom resistance: biologists discover the secret

But wild pigs, like honey badgers, have long shared the same parts of the world as venomous snakes giving them an incentive to evolve venom resistance. And that in turn has given the snakes an

The scientific reason why the honey badger doesn't have to ...

It's not because of some natural immunity to venom. The honey badger, also known as the ratel, can die from poison stings and bites, but usually survives thanks to its thick, tough skin.

Are Honey Badgers Immune to Venom? | Reference.com

Honey badgers have a strong immunity to venom from snakes and scorpions. They also have other physical characteristics that protect them from envenomed bites and stings. Honey badgers, or ratels, eat so many snakes and scorpions that they develop a natural immunity to the venom of these animals.

11 Fierce Facts About the Honey Badger | Mental Floss

The honey badger may even have a resistance to snake venom and is sometimes able to sleep off a bite. (Their thick skin comes in handy in this way, too.) (Their thick skin comes in handy in this

Venom Vaccine | Ultimate Honey Badger

Badgers need to build up their tolerance for venom and a scorpion is perfect for this young guy. Subscribe: <http://bit.ly/NatGeoWILDSubscribe>

The World's Most Fearless Creature is the Honey Badger

Although it is not known exactly how the Honey Badger's body resists the effects of these types of deadly venom, it is thought that if the snakes could strike them enough, it is likely the venom would eventually kill the Honey Badger. Unfortunately for the snake though, they are unlikely to survive long enough in a battle with a Honey Badger to strike it enough to kill it. Further, it takes

The Honey Badger - *Mellivora capensis*

This immunity may develop over the life time of the honey badgers due to regular contact with small amounts of venom in snakes, scorpions and bees. Young cubs are prevented from catching poisonous snakes by their mothers until they have the necessary skills and coordination.

The Crazy Nastyass Honey Badger (original narration by Randall)

\*Special thanks 2 Colleen+Keith Begg for their extensive

work & care for wildlife and honey badgers. These two are HB OG. These two are HB OG. \*To learn more about the Honey Badger, get Randall's

What makes a honey badger immune to cobra venom? | Yahoo ...

Best Answer: Cobra venom is a nerve poison that works by binding to muscle-type nicotinic acetylcholine receptor (nAChR). By doing so, the bite victim's own neurotransmitters (in this case acetylcholine) cannot bind to the same receptors.
