Gray Wolves in the Great Lakes | Defenders of Wildlife

Gray Wolves in the Great Lakes Wolf restoration in the Western Great Lakes is an Endangered Species Act success story, for now. More than 30 years of federal protection in the region helped to bring this critically important animal back from a small remnant population in northern Minnesota to current numbers of more than 4,000 animals in Minnesota, Wisconsin and the Upper Peninsula of Michigan.

America's Gray Wolves: A Long Road to Recovery

After receiving federal protection, gray wolves saw tremendous recovery in the western Great Lakes region. Their populations grew to around 4,500 and expanded through Wisconsin and Michigan. Through natural migration from Canada and reintroduction to Yellowstone National Park and central Idaho, wolves returned to the **Recovery of gray wolves in the Great Lakes Region of the ...**

The Great Lakes region is unique in that it is the only portion of the lower 48 states where wolves were never extirpated. As the birthplace of some of the modern concepts of wolf conservation and research, the region is also the first place in the US where 'endangered' wolf populations recovered.
